ChargeSOL's

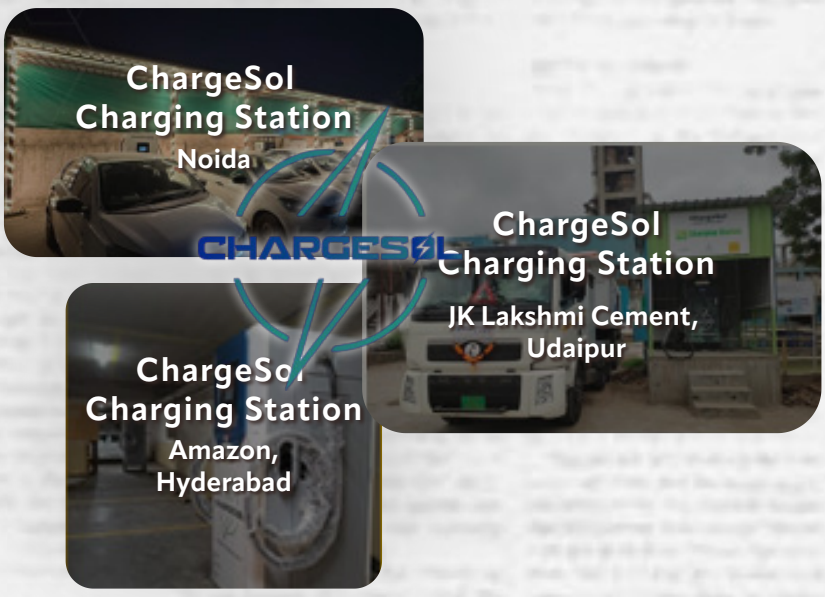
₹- About Us

Scripting The Next Chapter Of India's Sustainable Journey

ABOUT US:

ChargeSol is a B2B EV Charging Solution provider with an aim to contribute maximum in the adoption of Electric Vehicles in India.

Our core offerings include Charging As a Service, EPC, O&M (EV Charging Infra), Charging Management Software, ensuring a seamless EV operating experience.



OUR AIM:

At ChargeSol we aim to make roaming and interoperability a reality in India by building the backend operating system, which will also accelerate the transition to Electric vehicles across the country, fulfilling a low-carbon future.

Our Big Audacious Goal (B.A.G) is to be the largest community of the EV Industry. We will be the go-to-marketplace for all the key stakeholders in this system.

MISSION:

Our mission is to enable 5 million EV owners to travel hassle free with a charging network of 100,000 chargers on a single app around the country by providing a seamless charging experience across the networks of multiple CPOs
